**South Indian Education Society of Arts and Science College, Mumbai**
- **2019**  
**SSC**  
**St. Michael High School, Mumbai**

## Interested Field

- Machine Learning
- Software Developing
- Web Development

## Project Works

- **Writer's House** - Writer's House is an online platform powered by PHP and Bootstrap, providing writers a space for sharing stories, poetry, essays, opinions, and knowledge. Crafted by a full-stack developer, the user-friendly environment encourages creativity.
- **Sign Language Detection** - The Sign Language Project utilizes Machine Learning to detect hand signs, showcasing an innovative approach to bridging communication gaps. Developed with precision, this project employs advanced algorithms for accurate detection.
- **InstaAmi**, a dynamic social media platform, incorporates a MERN Stack architecture for seamless user experience. As a developer, I focused on enhancing the admin side. Leveraging MongoDB, Express.js, React.js, and Node.js, InstaAmi equips administrators with robust tools for user moderation and analytics. This empowers efficient oversight of user activity, ensuring a safe and engaging environment.
